

Alex Tuisang

Professional Summary

AI & Machine Learning Engineer with hands-on experience in building and deploying ML models. Strong foundation from Udemy engineering coursework and continuous learning through Google AI resources. Skilled in developing data-driven solutions and working with modern AI tools.

Technical Skills

- Programming: Python
- Libraries/Frameworks: NumPy, Pandas, Scikit-learn, PyTorch
- Tools: Jupyter Notebook, Google Colab, Vertex AI
- Concepts: Data preprocessing, feature engineering, model training, evaluation

Experience & Projects

- Developed multiple machine learning models for predictive tasks
- Built end-to-end ML pipelines from data cleaning to evaluation
- Experimented with different algorithms and optimization techniques

Education

Machine Learning Engineering Course – Udemy

Continuous Learning

- Google AI learning programs
- Currently working with Vertex AI and cloud-based ML workflows

Availability

Open to full-time roles and freelance opportunities in AI and Machine Learning.
